Stillwell Funeral Saturday.

Mortimer E. Stillwell, whose death was reported on the front page of yesterday's World, will be remembered in Tulsa as the man who organized the Union National Bank of Bartlesville and who was one of the founders and first officers of the Indian Territory Illuminating Oil company. His funeral will be held Saturday afternoon under the auspices of his brother Masons. He has been taken at the degree and having held all the places of honor in that order. The chances are that will be a large delegation from Tulsa, especially from the oil fields, on the afternoon train on the Santa Fe which arrives in time for the funeral.

Mr. Stillwell went to Denver knowing that he was a victim of that most dread disease, tuberculosis, and yet maintained a brave heart to the last. He will be mourned as long as the present generation of oil men inhabit the earth.

Granite Well Again Flowing.

Special to the World.

GRANITE, Okla., May 1.—A 48-hour pumping test on the second well of the Granite Oil company No. 25-21-21, is showing the well good for the amount of oil as the drillers previous estimate. It is now making a steady flow of oil day and night and the crew is erecting tanks of 1,500 barrels capacity while the oil is being pumped at the present time into two large slush pits. The company today made location for their second well and will begin erecting tanks in the same place. Frank Turner, owner of the well, is much pleased that the well is better than hoped for and stated Wednesday that his company would have number of rigs at work in less than 20 days in developing his holdings. Several outside rigs should arrive within the next few days. Interest, 6000, continues to grow, great interest in the price of acreage jumped again with the actual result of the pumping test became known today. The town boom continues to receive its share of interest from the new field.

Our correspondent fails to say just how much the Granite well is making and thus the interest is centered in the well here. The latest report sent by电报 is that the well is good for about 10 barrels of oil.

Northwest of Pawhuska.

The Red Bank Oil company No. 1 in the center of the east line of the northwest of 2-26-8 is shut down at 1,600 feet.

The Minnesota Oil company No. 1 in the southwest corner of the northeast of 12-26-8 had some gas with a show of oil in the sand at 2,225 to 2,230 feet. It is drilling now at 2,235.

In the southeast corner of the northwest of section 14 the same company is spudding in its No. 1.

The Concord Oil & Gas Co. in the northeast of the southeast of 18-19-8 has a hole full of water at 1,600 feet. They may abandon at this depth unless the water can be closed off.

The Pine No. 1 Bradford in the northwest of 12-21-13 has the sand from 1,720 to 1,730 feet and is making 15,000,000 feet of gas.

The Labranc Oil company No. 1 Miller in the northeast of 5-8-14w is shut down at 2,570 on account of the gas blowing down. They will rebuild it at once.

The J. P. Evans and others No. 1 8-11w is shut down on the top of the sand from 2,570 to 2,580 feet with a small show of oil and gas.

The Granite Oil company No. 1 Williams in the northeast of 22-7-21w have a small well if they can shut off the water.

The Caddo Petroleum company No. 1 Row in the northeast of 22-6-10w has the sand from 2,000 to 2,020 feet with a small show of oil and gas another sand from 2,275 to 2,280 feet, which showed up for about 20 barrels.

The Labranc Oil company No. 1 Jannigan in the northeast of the northwest of the northwest of 18-28w is drilling at 1,150 feet.

Northern Oklahoma.

The Empire Gas & Fuel company No. 5 A. Duluth an old gas well, which is being drilled deeper, is now shut down on the top of the gas sand at 2,625 feet. It is located in 21-21.

The McKaskey & Wentz No. 8 Welch in the northwest quarter of 17-24-8 got the sand at 1,960 to 1,970 feet and is estimated at 50 barrels.

The Carter Oil company No. 22 Warren in 20-28-1 has the sand from 2,025 to 2,030 feet and is estimated at 75 barrels.

The National Union Oil company No. 13 Long in the northwest quarter

of 25-28-1 has the sand from 1,890 to 1,900 feet and is making 30,000,000 feet of gas.

The Oklahoma Oil company No. 1 Brown in the northeast corner of 22-28-1 has the sand at 2,000 feet and has about 30 feet. It is making 300 barrels.

The Carter Oil company No. 4 Hayes in the northeast corner of the southeast of 25-28-1 is drilling at 1,000 feet.

South of Purcell the Blue Eagle company has a 20-barrel well in No. 1 in the center of the north half of section 21-24-8. The total depth of the well is 2,000 feet.

The same company No. 5 Hayes in the same section is drilling at 2,280 feet.

The Caddo Oil company No. 1 Hayes in the southeast corner of 18-21-8 has the sand from 1,940 to 1,950 feet and will make a small well.

The Marland Refining company No. 14 Gila in the center of the northwest of the southwest of the southwest of 18-21-8 is dry and abandoned at 2,000 feet. They had about a small show in the 2,200 foot.

The same company No. 10 Hill in the southeast corner of 18-21-8 has the sand from 1,840 to 1,850 feet and is estimated at 300 barrels.

The Carter Petroleum company No. 1 Cimarron in 23-23-8 has a drilling job at 2,350 feet.

The Humphreys Petroleum company No. 1 Buffels in the northeast of 12-21-8 had a sand from 2,130 to 2,138 which was dry, and are now 2,138 feet.

The Prairie Oil & Gas company No. 1 Winkard in 18-21-8 had the sand from 1,285 to 1,295 feet and is estimated at 25 barrels.

The Exchange Oil company No. 1 Denker in the southwest corner of 12-21-8 are rigging up to drill deeper. It will be remembered that this well was completed in April 1918, and produced about 50 barrels per day.

The Exchange Oil company No. 1 Walker farm in 13-22-8w is dry and found from 1,200 to 1,225 feet. The company has about 15 strings running in this district.

The Roxanna Petroleum company No. 7 Schroeder in the southwest corner of 18-22-8w has a sand from 1,450 to 1,455, which is making 15,000,000 feet of gas. They found another sand at 2,000 feet with a good showing of oil.

The Hominy and Vicinity South of Pawhuska.

The Coddon oil company is rigging up No. 3 in the southwest corner of 18-19-11w.

The A. H. White Oil company No. 1 Narcissus in the southwest corner of the southwest of 9-18-11w is dry at 2,000 feet.

The Pennington Oil company No. 9 Grayson in the southwest corner of 17-18-11 has a hole full of water at 1,600 feet, and they will probably go on to the 2,200 foot sand.

The Texas company No. 4 Euchee Tom in 28-18-10 is drilling at 809 feet.

The A. H. White Oil company No. 1 Narcissus in the southwest corner of the southwest of 9-18-11w is dry at 2,000 feet.

The Prairie Oil & Gas Co. No. 1 Littlehead in the northeast of 18-19-11 has the gas sand at 2,000 feet and sand from 2,340 to 2,375, which is at 2,000 feet, and are going deeper.

The Concord Oil & Gas Co. in the northeast of the southeast of 18-19-11 has a hole full of water at 1,600 feet.

The Texaco oil company No. 1 in 18-19-11 which came in for 800 barrels, now has about 500 barrels every day.

The Campbell & Parker No. 2 in the northwest of the southwest of 21-19-11 has a showing for a small well in the 1,000-foot sand, and they will probably go on to the 2,200 foot sand.

The Texas company No. 4 Euchee Tom in 28-18-10 is drilling at 809 feet.

The A. H. White Oil company No. 1 Narcissus in the southwest corner of the southwest of 9-18-11w is dry at 2,000 feet.

The Johnson & Wissel No. 1 in center of 18-19-11w is rigging up.

The Texas company is spudding No. 1 in northwest corner of 23.

The Red Bank Oil No. 1 in northeast corner of northwest, northeast, northwest, northeast of same section is shut down for water at 2,000 feet.

W. D. Emeritt No. 1 in northeast corner of southeast, northeast, northwest of 18-19-11 has the sand from 2,025 to 2,035 feet, which is at 2,000 feet.

The Empire No. 1 in southwest corner of southeast, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet, and is estimated at 50 barrels on the beam.

The same company No. 6 McClure

in southwest corner of northwest, northeast, northeast of 18-19-11 has the sand from 2,040 to 2,050 feet and is making 100 barrels natural gas.

The Empire Oil company No. 1 Turner in the northeast of the northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.

The same company No. 1 in northwest corner of northwest, northeast, northwest, northeast of 18-19-11 has the sand from 2,045 to 2,055 feet and is making 10 barrels a day.
